Thickness	23 mm								
Colour	White								

Cleaning and finishing	Surface cleaning and the finishing of the grouting must be carried out whilst the product is still fresh, taking care not to empty the joints and without leaving any streaks. Wet the grouted surface with clean water and work in the grout using Starlike® Pro felt, using circular movements to ensure the joints are completely filled and to remove any excess product from the surface. Carry out a second pass with the damp Pro Starlike® sponge made of
-------------------------------	--

Sweepex to achieve a smooth, compact surface, completely removing the product from the tiles without emptying the grout lines and wiping away any excess water.

To make cleaning easier, we recommend using two bowls of water at the same time: one for rinsing the felt and sponge, and the other for the final clean of the surface with clean water.

When the felt and sponge are saturated with resin and can no longer be cleaned, they must be replaced.
